3. Syncing to Outlook

***Note**: Only contacts local to the device will be synced to/from Outlook; Gmail contacts will not be synced.

Check **All Contacts** to synchronize all contacts between Outlook and the device.

- **Syncing Direction** allows control over whether Kies syncs information to just Outlook, just the device, or both.
- You can put contacts synced from the device to a specific folder in Outlook by using the **Mailbox** drop-down.
- The **Sync group** check box allows contacts from the device to be automatically synced to Outlook contact categories.

Check the **Sync schedule with Outlook** or **Sync To Do with Outlook** boxes to change the settings for calendar and notes.

Click the **Sync** button to sync the checked options.

4. Syncing to Google or Yahoo.

Change the destination of the synchronization by clicking the **Sync contacts with** drop-down.

Select the desired destination for the sync.

***Note:** The option to sync calendars or notes with Google or Yahoo is not available.
